SUMMARY

I started my career as a health record assistant trainee at a small district hospital in Kisii county; this is where I first interacted with production data in KenyaEMR. Over the years, I have seen my level of interests and skills in data management grow. I have worked with DHIS2, REDcap, and I often use excel a lot in my current role. I would love deeply immerse myself in a more challenging environment and to advance my skill set in data management.
